

Remanufactured Lift Truck Parts

Remanufactured Forklift Parts - Lift trucks are really costly pieces of machines. A five thousand pound new electric model could cost between \$18,000 to \$25,000 and some thousands of dollars more will be needed for a battery and a battery charger. A similar internal combustion forklift of similar lift capacity would cost a little less and the diesel units that are capable of heavier lifting capacities could cost upwards of \$100,000. Reconditioned lift trucks are an option so as to save much money as they cost less than half the price of brand new models.

A few buyers may be leery about acquiring a second-hand or reconditioned lift truck since they feel they would have to spend more on upkeep. Then again, a correctly reconditioned lift truck will be able to run just in addition to a new one. Although your lift will get heavy use, as long as you take proper care of the machinery, it will serve all your needs and potentially save you a lot of money.

It is vital to determine what the seller means by a refurbished or reconditioned lift truck when thinking about buying a second-hand lift truck. Many companies do a very good job reconditioning a unit previous to selling it. This includes disassembling the lift truck, rebuilding the engine, sandblasting the lift and next reassembling the whole thing and finishing with a fresh coat of paint.

To properly and thoroughly rebuild a forklift engine, a good company will completely disassemble it. A heat cleaning system could then be utilized to clean all the components. Once this step has been finished, all of the parts are checked to see if they have any extensive wear, any defects or breakage. Some parts such as connecting rods, cylinder heads, crankshafts and cylinder blocks are reground, resurfaced and resized if necessary. Several parts like gears, nuts, bolts and all that. are replaced or repaired as considered necessary.

The engine is rebuilt by hand as soon as the overhaul has been accomplished. After putting it back together, a series of tests are applied to the working machine. This is done to be able to check all of the components to ensure there are no problems or leaks. If any problems occur, the necessary alterations are made.

There should be no reason to be apprehensive about obtaining a refurbished or reconditioned lift truck from quality sellers. The process of rebuilding the equipment guarantees the utmost in dependability. Repairs costs can actually work out to be less for the reason that you would avoid the initial phase of higher upkeep projections that a brand new forklift has as it is broken in. By following routine maintenance schedules and taking care of the machine properly, a reconditioned lift truck would serve you well.
