

## Barrel Clamps

Barrel Clamps - A Barrel Clamp is actually a mechanical or hydraulic attachment designed for a lift truck. It can be used in order to grip the item you want to move using the lift truck and is often utilized for handling paper rolls, barrels, and kegs. Several designs of barrel clamp attachments even have a revolving function. For example, the revolving function allows a lift truck operator to insert a vertically stored paper into the horizontal intake of a printing press.
