

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country journey in their RV. Recently retired, after spending many years working with his brother to assemble their crane business into a market leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

During their journey, John reacquainted himself with previous business associates along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial marketplace for a product that could promptly and safely elevate people in the air to accomplish maintenance and other construction functions.

Following their return from vacation, John set up a partnership with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design essentials of that original lift into existing models.

JLG lift trucks have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the company proudly continues to expand itself into various markets worldwide and develops new products to make certain consumers are capable of being more effective and perform in the workplace within a safer environment.
